Smedley III Analog Grip Strength Dynamometer With Case.

Item # T-18. This is the most popular and widely used grip tester/hand dynamometer in the world. Manufactured in Japan it is the most accurate with an accuracy of ± 2 kg from 5 to 100 kg and a resolution of 1 kg. It is very durable with a protective clear cover over the pointer. Pointer retains maximum reading and can then be returned to 0 for the next test. Grip distance adjustable from 4cm to 7cm to accommodate a wide range of hand sizes. Includes Case. One Year Warranty. See our website for current pricing, chponline.com

Hand Dynamometers are used to secure an index of general upper body strength, an index of right-vs-left handedness and general comparison purposes. They may be used to formulate an index of endurance of fatigue, or may be combined with other forms of strength measurements for comprehensive data about a Subject's total physical fitness.

Strength Training

Smedley III Digital Grip Strength Dynamometer With Case.

Item # T-19DRC. This is the Digital version of the T-18 Analog Smedley III. This is the most popular and widely used digital grip tester/hand dynamometer in the world. These dynamometers are used in many occupational therapy and physical therapy clinics to assess patients in setting baselines for rehabilitation programs and for measuring progress made by patients who are working through the rehabilitation process. Manufactured in Japan it is the most accurate with an accuracy of +/- 2 kg from 5 to 100 kg and a resolution of 0.1 kg. It shows the peak reading for a measurement and can then be reset to "0" for the next test. It also can compute a mean value for four consecutive measurements. It is a very durable and reliable instrument. Grip distance adjustable from 4cm to 7cm to accommodate a wide range of hand sizes. Includes Case. One Year Warranty. See our website for current pricing, chponline.com.
